

Videographer

Regenerative Farming Greece has set out the goal to create a vibrant learning community around regenerative farming in Greece, to support farmers in their transition to a farming operation, that regenerates ecosystems while being resilient to climatic and economic challenges.

Sharing knowledge through engaging videos shedding light on successful farming operations and creating videos that change the narrative and can inspire a whole generation and nation of farmers to live up to their role of eco-systems regenerators, will be our job. If this mission excites you and you think you should join our team as a videographer, we will be happy to get to know you!
